

# FlexRite™ MT1 Modular Tile System

Designed to easily build a custom sized floor with standard tiles, ramps, and corners in dry or wet areas

- Location: Indoor, Outdoor, Platform, Walkway, Workstation, Custom
- Environment: Dry, Wet, Oily, Slippery

- **VERSATILE** | Lightweight design and interlocks allow for easy installation, reconfiguration, and frequent cleanings
- **DURABLE** | Cutting fluid, grease & oil proof; tough abrasion & chemical resistance; welding safe; UV resistant
- **FLEXIBLE** | Quickly & easily build to any size or shape required. Reconfigure as needed. Add safety edging to entry or exit areas
- **SAFE** | Optional interlocking beveled edges on all sides provide for a safe transition on and off the tiles. Slip-resistant high coefficient of friction materials & design. Applied for NFSI certification
- **COMFORTABLE BALANCE** | Compression (soft rubber/TPE compound) and deflection (underside design pattern) work together to give maximum comfort standing still or walking across the mat
- **COMPOUND** | ReviveRite™ high quality rubber and eco-TPE compounds derived from 100% recycled polymers providing nitrile rubber equivalent chemistry.

#### FLEXIBLE DESIGN

MT1 is lightweight and durable designed to stand up to harsh chemicals while maintaining a high traction surface. Made from ReviveRite™ compound, it's the only tile system in the industry with the perfect balance built into the compound. All the positive traits of rubber (soft, high traction, welding safe, ESD) and the positive traits of plastics (positive locking system, cut & reconfigure, multiple colors).

Unlike traditional plastic modular tiles that are stiff, in many cases too hard, MT1 is lightweight, flexible, and easy to roll up. They can be scrubbed with a brush, power washed, autoclaved, or put in a commercial dishwasher.

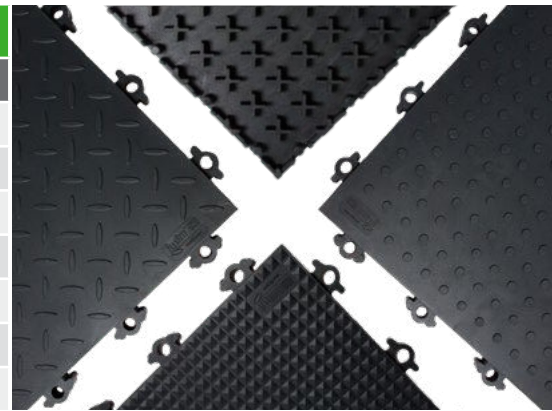

# FlexRite™ MT1 Modular Tile System

## WHAT IS REVIVERITE Inside!?

All FlexRite™ mats and interlocking tiles are molded using 100% post-consumer and post-industrial polymers recycled in an environmentally friendly way in our vertically integrated facilities. The ReviveRite™ process uses food and medicine grade additives to restore the original technical capabilities of various post-use polymers without the harmful side effects of foreign rubber reclaiming process. We produce superior cost-performance compounds that translate into higher-polymer-content, and as such, higher quality molded products as compared to typical products derived from virgin polymers.

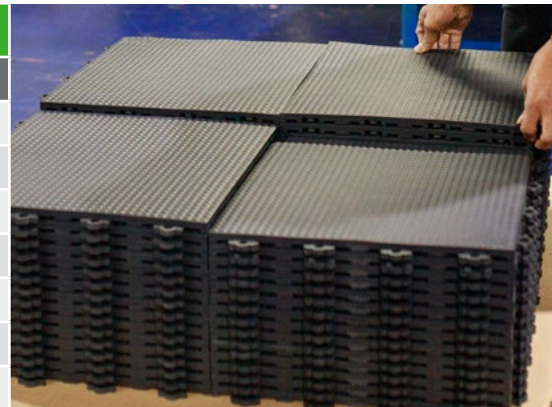

### MT1 5/8" MODULAR TILE SYSTEMS

Part Number	Style	Color	Size*	Weight
MT1.58x16x16.DI.BK	Diamondplate	Black	16" x 16"	3.4 lbs.
MT1.58x16x16.HN.BK	Hobnail	Black	16" x 16"	3.4 lbs.
MT1.58x16x16.PY.BK	Pyramid	Black	16" x 16"	3.5 lbs.
MT1.58x4x16.RF.YL	Ramp Female	Yellow	4" x 16"	0.7 lbs.
MT1.58x4x16.RM.YL	Ramp Male	Yellow	4" x 16"	0.8 lbs.
MT1.58x4x22.CF.YL	Corner Female	Yellow	4" x 22"	1.2 lbs.
MT1.58x4x22.CM.YL	Corner Male	Yellow	4" x 22"	1.3 lbs.

### MT1 1" MODULAR TILE SYSTEMS

Part Number	Style	Color	Size*	Weight
MT1.1x16x16.DI.BK	Diamondplate	Black	16" x 16"	4.2 lbs.
MT1.1x16x16.HN.BK	Hobnail	Black	16" x 16"	4.1 lbs.
MT1.1x16x16.PY.BK	Pyramid	Black	16" x 16"	4.2 lbs.
MT1.1x4x16.RF.YL	Ramp Female	Yellow	4" x 16"	1.3 lbs.
MT1.1x4x16.RM.YL	Ramp Male	Yellow	4" x 16"	1.4 lbs.
MT1.1x4x22.CF.YL	Corner Female	Yellow	4" x 22"	1.3 lbs.
MT1.1x4x22.CM.YL	Corner Male	Yellow	4" x 22"	1.5 lbs.

Available Tile Colors: BK-Black, GY-Grey, TC-Terracotta | Available Ramp Colors: BK-Black, YL-Yellow
